Subject: Request for call on Comanche treatment system
Date: Thursday, February 25, 2021 1:50:31 PM

Hi Linda,

When we had our last update call on Comanche earlier this month, we targeted early April for our next discussion. This time frame is still appropriate for discussion of the results of the January sampling event. However, we would like to have a call sooner than that to update EPA on our progress towards installation of the treatment system to replace the function of the existing bottom ash pond. We have been working diligently with our consultant and vendors, and have begun work to install a temporary system in order to meet the April deadline, followed by installation of a second more permanent system to operate through 2025 when generating Unit 2 is retired. We have the following times available next week, if you could let us know if any of these would work for EPA. Thank you.

- Tue 3/2 230-330
- Wed 3/3 3-4
- Thu 3/4 9-330
- Fri 3/5 9-10 or 12-4
